

Description

General Purpose Liquid-Filled Pressure Gauges are designed for pressure measurements in different industrial applications where high accuracy is not needed. General Purpose Liquid-Filled Pressure Gauges have various case designs and wide pressure meusurement range and are all compatible with process fluids that do not attack copper alloys. The filling liquid used in the products lessens the effects of high dynamic pressure loads and vibration to the pressure gauge.

Industrial Applications

Water&Waste-Water treatment plants, machine building, HVAC systems, hydraulic and pneumatics, process lines
